To:

Subject:

Sequence search of Application No.10/060,765

Please do a standard search on:

- (i). SEQ ID NOS: 4, 7, and 8 against both commercial and interference amino acid databases.
- (ii). An oligomer of SEQ ID NO: 4 against both commercial and interference amino acid databases.

Thank you very much!

Ruixiang Li GAU 1646 REM 4D75 Mail Box 4C70 (571) 272-0875

Claim 15. An epitope-bearing portion of the polypeptide of SEQ ID NO: 4.

Claim 16. The epitope-bearing portion of claim 15, which comprises between 10 and 50 contiguous amino acids of SEQ ID NO: 4.

GENERAL INFORMATION:

APPLICANT: Zhong et al.

TITLE OF INVENTION: THERAPEUTIC POLYPEPTIDES, NUCLEIC ACIDS ENCODING SAME, AND METHOD FILE REFERENCE: 2003-09-09

CURRENT APPLICATION NUMBER: 60/295, 607

PRIOR FILING DATE: 2001-06-04

PRIOR FILING DATE: 2001-06-04

PRIOR APPLICATION NUMBER: 60/295, 404

PRIOR APPLICATION NUMBER: 60/296, 418

PRIOR APPLICATION NUMBER: 60/297, 414

PRIOR PILING DATE: 2001-06-01

PRIOR APPLICATION NUMBER: 60/297, 414

PRIOR FILING DATE: 2001-06-11

PRIOR APPLICATION NUMBER: 60/297, 567

PRIOR APPLICATION NUMBER: 60/297, 567

                                                                                                                                                                                                                                                                                                                                                                                                                           Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       1113

Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
